Professional Summary

Results-driven Software Engineer with over 3 years of experience specializing in FinTech architecture, digital banking solutions, and mobile backend integration. Proven track record of managing parallel project developments and leading cross-functional teams to deliver secure, scalable payment ecosystems for major financial institutions. Expertise in Java, TypeScript, Spring Boot, and modern frontend/mobile frameworks, coupled with strong hands-on experience in server management, API development, and production support.

Professional Experience

Freelance Web Developer, *Mathy Surf Coach* 09/2026 – Present
Weligama, Sri Lanka

- Designed, built and launched the school's marketing website end to end for a client, using React, Vite, Tailwind CSS and Framer Motion, with every section content-driven so non-developers can update prices, spots, reviews and FAQs.
- Implemented a WhatsApp-based booking flow, an interactive surf-spot map (Google Maps with automatic Leaflet and OpenStreetMap fallback), and a responsive gallery, lesson and package showcase.
- Improved SEO and discoverability with prerendered HTML, a sitemap, structured data and a branded social share card; achieved Lighthouse mobile scores of 96 (Performance), 100 (Accessibility), 100 (Best Practices) and 100 (SEO).
- Deployed to Cloudflare Workers with caching and security headers, and set up CI builds on every push.

Software Engineer, *PayMedia* 05/2025 – Present

- Managed the parallel development of multiple projects and spearheaded all development deliverables for a dedicated client, ensuring timely and secure deployments.
- Architected and maintained fintech and digital banking application components for regulated financial service environments.
- Engineered backend APIs, database-driven business logic, and service integrations utilizing Java, Spring Boot, and SQL.
- Developed web-based operational and administrative modules using React, Next.js, JavaScript, and TypeScript.
- Orchestrated secure financial transaction workflows, account-related operations, and integration points with banking and third-party systems.
- Investigated production and UAT issues by analyzing server logs, reviewing transaction records, and identifying root causes to maintain high system availability.
- Coordinated seamlessly with QA, infrastructure, business, and engineering teams during testing, deployment verification, and production releases.

Associate Software Engineer, *PayMedia* 04/2024 – 05/2025

- Engineered and deployed full-stack platform enhancements across backend, frontend, and integration layers.
- Implemented and maintained REST APIs, service-level validations, and business logic for banking-related workflows.

- Improved web portal features for operational users utilizing React, Next.js, and TypeScript.
- Resolved complex production bugs by analyzing server logs, transaction failures, and API response mismatches, actively reducing onboarding friction.
- Facilitated integration activities between financial applications, banking services, and external service providers.
- Participated in code review discussions, UAT support, and release coordination.

Associate Software Engineer, *DirectPay* 05/2023 – 04/2024

- Enhanced backend and web application features for fintech and digital banking platforms.
- Developed customer-facing web features and supported backend service improvements for banking application workflows.
- Collaborated across APIs, databases, and frontend components to deliver complete application features.
- Improved application reliability by rapidly fixing defects and validating service behavior across testing and production environments.

Software Engineer Intern, *DirectPay* 11/2022 – 04/2023

- Assisted in developing production-ready features for fintech and digital banking web applications.
- Supported backend and frontend development tasks involving APIs, database operations, and application functionality.
- Built foundational knowledge of API-driven development and secure application delivery within the financial domain.

Education

BSc (Hons) Software Engineering, *Cardiff Metropolitan University* 2025 – 2026

Graduate Diploma in Software Engineering, 2021 – 2023
Institute of Java and Software Engineering (IJSE)

Technical Skills

Programming Languages
Java, JavaScript, TypeScript

Frontend / Web Development
React, Next.js, JavaScript, TypeScript, Vite, Tailwind CSS, Framer Motion, customer-facing web features, admin portals

Infrastructure & Servers
Red Hat Linux, Cloudflare (Workers/Pages deployment), Nginx configurations, systemd services, cron jobs, server management

Tools & Practices
Git, GitHub, API integration, debugging, log analysis, UAT support, release support, issue troubleshooting

Backend Development
Spring Boot, Node.js, Express.js, REST API development, backend business logic

Databases
SQL, Oracle, MySQL, MongoDB

FinTech / Banking Domain
Digital banking platforms, payment systems, financial transaction workflows, banking integrations, production support

Key Projects & Academic Achievements

Train Parcel & Ticket Booking System
Developed a full-stack web application featuring a Spring Boot backend and a Next.js frontend to manage railway bookings and logistics.

Flat Price Prediction Model
Built and trained a predictive model as part of a Kaggle data science competition to forecast real estate pricing.

ISPs & Streaming Services Research
Conducted comprehensive university research on Internet Service Providers and the ethical, social, and legal concerns surrounding modern streaming services.

Confidentiality Note

Client names, bank names, platform names, and project names within my employment experience (PayMedia and DirectPay roles) have been generalized due to employment NDA obligations. Freelance work is not covered by these restrictions and is named openly.
